

HIV TRAINING

Facilitated by Barry Schmidt, Health Coordinator

schmidt@baisd.net

HIV Full Day

This full day on-site training will cover Michigan's laws on HIV/STI education in public schools and what this means for teachers. It will also provide information on current trends, transmission methods, prevention strategies, testing and treatment options for HIV and other STIs, and how to access related health services. The training will also address how personal experiences, values, and biases can affect teaching and learning and provide best practice strategies for making HIV/STI education age-appropriate, engaging, relevant, inclusive, and effective. By the end of the session, participants will be able to identify the knowledge and skills students need at different grade levels to make healthy choices and reduce the risk of HIV and other STIs.

Lunch is provided and sub-reimbursement is available.

HIV Training (virtual)

For teachers who instruct students in Sex Ed and HIV Prevention from Grades 4-12, this virtual course provides a concise overview of State Law mandates. The law requires every public school district to provide HIV prevention education at every building level (elementary, middle, and high school). The course covers the basics of HIV prevention, including transmission and treatment, an effective curriculum for this topic, and how to answer students' sensitive questions.

SCECHs are available for all sessions.

MICHIGAN PROFILE FOR HEALTH YOUTH (MIPHY) TUTORIAL AND PLANNING

Facilitated by Barry Schmidt, Health Coordinator

schmidt@baisd.net

The MiPHY is a voluntary and anonymous online student health survey provided by the Michigan Department of Education for use by school districts to assess the health-related needs of their students. The MiPHY provides building and district-level reports on health risk behaviors and protective factors reported anonymously by students in grades 7, 9, and 11. Participants will learn how to create a MiPHY account, conduct the MiPHY survey, and understand the significance and usefulness of the survey for school programming and funding.

Participants will learn how to create a MiPHY account, conduct the MiPHY survey, and understand the significance and usefulness of the survey for school programming and funding.

SCECHs are available for all sessions.
